the stairs leading to the tower and made access to the tower safe; Joe Burrell, who is preparing to screen off the holes under the eaves and to replace the broken lancet windows on the fourth story of the tower and make it impossible for pigeons and starlings to again enter the tower. After the tower bell has rung seven times, the bells of the churches of Carbondale will ring and the Hendrick horn will sound and in that manner the message will be relayed far and wide that Carbondale City Hall is a living building. For arranging to have the church bells ring and the Hendrick horn sound, we are indebted to Nan Loftus, Jean Colville, and Joe Pascoe. When all of the bells of Carbondale have stopped ringing, we will convene in the City Council chambers on the second floor of this building for the biweekly meeting of the Committee to Restore Carbondale City Hall. Everyone is invited to attend.

What we do here tonight, we do to remind the world of three facts: (1) that there is life in this magnificent building; (2) that Carbondale City Hall is very much a part of our lives; and (3) that Carbondale City Hall is an integral part of the life of the city of Carbondale. What you will see and hear tonight at 7 P.M. is a demonstration. It does not mean, be it known, that the clock is repaired. The clock is still broken. The bell in the tower of Carbondale City Hall will ring tonight only because Tom Brennan will manually cause it to ring. What you will hear and see here tonight at 7 o'clock should not, therefore, be taken to mean that our work in regard to the tower clock and in regard to this building has been completed. On the contrary, our work has only just begun.

If you are not now a member of the Committee to Restore Carbondale City Hall, join with us, therefore, and help to keep the lights shining forth and the bell ringing in the tower of this building. Join with us, therefore, and help to restore this magnificent building so that it will always be a part of Carbondale. Join with us, therefore, as we reaffirm our faith in the city of Carbondale--past, present, and future.

Thank you.
